

The History of Balcrank

Balcrank began in 1906 in the heart of Cincinnati, Ohio's "Machine Tool Colony" as the Cincinnati Ball Crank Company. The first products produced by Balcrank were handwheels and cranks used by the machine tool industry. That same year Balcrank became the first mass producer of starting cranks for automobiles. In 1908 Balcrank entered the automotive industry with the manufacturing of steering drag links. The steering drag links were an immediate hit. Almost every car manufacturer adopted these Balcrank drag links and for the first time, steering a car became an easy task, instead of a laborious chore.

To follow its drag links were ball-sockets for spark and throttle control. Next came the famous Balcrank "bumpers". From that time on, Balcrank's place in the automotive picture was set.

Always looking forward, in 1922 Balcrank entered the lubrication field. The company secured both the patents and services of Clyde Butler, one of the nation's leading lubrication engineers. His inventions made Balcrank a pioneer in the field. He left behind scores of inventions which the world has adopted and still uses today.

During World War II, Balcrank was one of the very first to offer its plant services and facilities for government use, and at the end of the war, Balcrank had an "E" flag with four stars, which was indeed an honor. People always referred to the company as Ball Crank, so in 1943 the Board of Directors voted to change the name of the company to Balcrank, Inc.

Balcrank is one of the oldest manufacturers of automotive products. Many of the methods and devices used in lubrication service today stem from the basic patents of Balcrank and its engineers.

Balcrank now resides in the Blue Ridge Mountains of Weaverville, NC, continuing its rich history, and is still at the heart of the American automotive industry. Since its beginning, Balcrank has been providing its customers with the best products for the ever changing automotive and industrial markets that exist today. Balcrank and its employees want to thank you for your business, and look forward to the opportunities of tomorrow.

Balcrank's Achievements

Balcrank entered the lubrication equipment field in 1922 and since then has developed many "firsts" in the industry, thus attaining a recognized position of leadership in design and engineering progress. All Balcrank equipment is built to meet the highest standards of quality control and performance requirements.

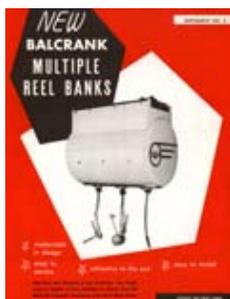

- 1906 First in mass production of machine handles for the machine tool industry.
- 1908 First in the mass production of the ball-socket type of tie-rod and drag-link steering connections.
- 1909 First in mass production of starting cranks for automobiles
- 1920 First and only mass producer of tubular bumpers for automobiles
- 1923 First patents on hydraulic coupler and fittings now universally used
- 1923 First high pressure foot operated volume grease gun - Model D - known the world over
- 1924 First high pressure air operated volume grease gun
- 1926 First power driven lubricator dispensing from the original grease container
- 1927 First air operated, high pressure, single shot, 116 power gun, Model PC
- 1928 First multiple outlet super station grease systems with grease storage containers built in 100 and 500 lb. capacities, Model C and ML

- 1929 First consistent air primed high-pressure volume gun for viscous lubricants, Model ZZ
- 1933 First level gun for "in line" operation on push type fittings
- 1935 First drum shell covers with pumps mounted for housing and dispensing from original grease containers

- 1943 First complete pneumatic lubrication center housed underground.
- 1948 Engineered and released new Jet Power Pump
- 1952 First pressure-matic adapter for Hi and Lo pressure lubrication
- 1958 First large capacity reels offered in a deluxe cabinet
- 1963 First pre-set oil meters for large capacity crankcase fill
- 1979 First high pressure safety handle. Must be attached to fittings
- 1987 Introduced the Director Jr. simplified inventory control system
- 1996 Introduced the Roughneck self evacuating drain
- 1999 Introduced Panther 3:1 and 5:1 air operated pumps
- 2003 Introduced Tiger 5:1 pump
- 2006 Introduced inductor pumping systems for bulk grease dispensing
- 2007 Introduced Fusion Wireless Fluid Inventory Control Systems
- 2008 Introduced a full range of Diesel Exhaust Fluid (DEF) dispensing systems
- 2009 Balcrank acquired by the Moratiel Group, one of the largest and truly global enterprises focused on fluid transfer systems for the automotive and industrial markets.
- 2010 Introduced Lynx series of pumps and outfits. 1:1, 2:1, 3:1 & 5:1
- 2010 Introduced ILM (in-line metered) series handles in both analog and electronic display

PISTON PUMPS | LYNX 1:1/ 2:1 PUMP

The Lynx 1:1 and 2:1 double action pumps are engineered for outstanding performance and reliability to transfer fluid from pails, drums, tanks, and totes. The Lynx pump provides fast delivery of cutting, synthetic, hydraulic, and mineral based lubricants.

The Lynx 2:1 multi-fluid pump is designed to provide the capabilities and versatility needed to transfer fluids to the point of application. Example of fluids: Detergents, cleaning fluids, synthetic hydraulic oil, antifreeze, windshield fluids, solvents, sealants or other corrosive fluids, etc, compatible with AISI 316, PTFE and Viton. NOTE: Warning! Do not use any Lynx series products with flammable fluids.

FEATURES:

- Double acting positive displacement pump – delivers fast uniform, constant flow.
- Patented air valve – designed to operate with low air consumption and moist air.
- Air valve design has fewer components - for reliable operation; easy and economical maintenance.
- Factory lubricated air motor - no need for air lubricator.
- Built in sintered brass air filter – assures clean & quiet operation
- Anodized aluminum air piston – corrosion resistant, less sensitive to moisture in air system.
- Height adjustable 2" bung adapter – to fit all types of drums, drum covers, tanks, etc
- Pump inlet easily accepts a variety of extensions - to fit all types and sizes of tanks and containers.

Technical data

Pump ratio: 1:1 or 2:1
 Operating air pressure range: 45 -150 PSI (3 -10 bar)
 Pump delivery with SAE 10-30 oil,
 68° F, 150 PSI air pressure and free flow:
 1:1 -10.6 GPM (40L/min)
 2:1 - 8.2 GPM (30L/min)
 Air inlet: 1/4" NPT (F)
 Pump outlet: 1:1 - 3/4" NPT (F)
 2:1 - 3/4" NPT (M)
 Pump inlet: (stub only) 1" NPT (F)
 Pump tube diameter: 2" / 51 mm
 Wetted materials:
 1:1 pumps..... steel, brass, aluminum, NBR and polyurethane
 2:1 drum 316SS, Viton, & PTFE

PISTON PUMPS | LYNX 3:1 PUMP

The Lynx 3:1 ratio double action pump is engineered for outstanding performance and reliability to dispense lubricating oils and similar products up to SAE 90 in piped systems

FEATURES:

- Double acting positive displacement pump – delivers fast uniform, constant flow.
- Patented air valve – designed to operate with low air consumption and moist air.
- Air valve design has fewer components - for reliable operation; easy and economical maintenance.
- Factory lubricated air motor - no need for air lubricator.
- Built in sintered brass air filter – assures clean & quiet operation
- Anodized aluminum air piston – corrosion resistant, less sensitive to moisture in air system.
- Height adjustable 2" bung adapter – to fit all types of drums, drum covers, tanks, etc
- Pump inlet easily accepts a variety of extensions - to fit all types and sizes of tanks and containers.

Technical data

Pump ratio: 3:1
 Operating air pressure range: 45 -150 PSI (3 -10 bar)
 Pump delivery with SAE 10-30 oil, 68° F, 150 PSI air pressure and free flow: 6.6 GPM (25L/min)
 Air inlet: 1/4" NPT (F)
 Pump outlet: 3/4" NPT (F)
 Pump inlet: 3/4" NPT (F)
 Pump tube diameter: 1 1/4" / 32 mm
 Wetted materials:
 steel, brass, aluminum, NBR and polyurethane

Note: Thermal expansion of the fluid in a distribution system can cause an increase in system pressure that can damage fluid distribution system components. Pressure relief valve, 3120-019 is recommended.

PISTON PUMPS | LYNX 5:1 PUMP

The Lynx 5:1 ratio double action pump is engineered for outstanding performance and reliability. The Lynx 5:1 pump is designed to dispense lubricating oils and similar products up to SAE 140 in piped systems

FEATURES:

- Double acting positive displacement pump – delivers fast uniform, constant flow.
- Patented air valve – designed to operate with low air consumption and moist air.
- Air valve design has fewer components - for reliable operation; easy and economical maintenance.
- Factory lubricated air motor - no need for air lubricator.
- Built in sintered brass air filter – assures clean & quiet operation
- Anodized aluminum air piston – corrosion resistant, less sensitive to moisture in air system.
- Height adjustable 2" bung adapter – to fit all types of drums, drum covers, tanks, etc
- Pump inlet easily accepts a variety of extensions - to fit all types and sizes of tanks and containers.

PISTON PUMPS | PANTHER® HP 3:1 PUMPS

FEATURES:

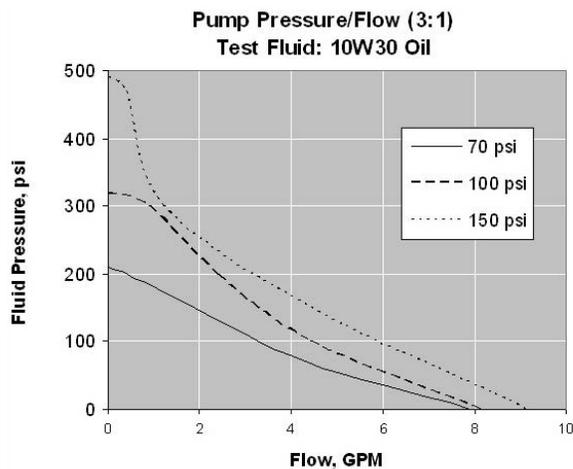

- Pressure relief on carbon steel models - Built in safety feature reduces premature wear of hoses and seals
- Mechanical air valve - More reliable, no stalling and no icing
- Designed for lower air consumption - Extends compressor life
- Built in muffler - Results in quiet operation and eliminates icing
- Stainless steel pump rod - Reduces corrosion and extends seal life
- Double acting pump lower - Delivers consistent fluid flow with greater dispensing accuracy

SPECIFICATIONS

Eff. diameter	2.50"
Operating air pressure range	10 -150 PSI
Air consumption (@100 PSI & 4 GPM)	19.70 SCFM
Max fluid stall pressure @150 PSI air	490 PSI

- 4310-003 16 gallon wide track
- 4310-004 55 gallon heavy duty

DRUM COVERS:

- 4420-005 16 gallon
- 4420-007 55 gallon

DRUM CARTS:

- 4320-004 16 gallon
- 4320-006 30 gallon
- 4320-008 16 -55 gallon

BUNG ADAPTERS:

- 4411-009 Aluminum
- 4411-018 Double Tapped Bushing

WALL MOUNT BRACKET:

- 4411-008

PISTON PUMPS | TIGER® HP 6:1 PUMPS

FEATURES:

- Pressure relief on carbon steel models - Built in safety feature reduces premature wear of hoses and seals
- Mechanical air valve - More reliable, no stalling and no icing
- Designed for lower air consumption - Extends compressor life
- Built in muffler - Results in quiet operation and eliminates icing
- Stainless steel pump rod - Reduces corrosion and extends seal life
- Double acting pump lower - Delivers consistent fluid flow with greater dispensing accuracy

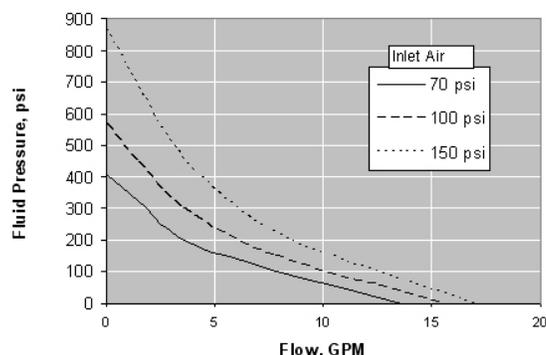

SPECIFICATIONS

Eff. diameter	3.20"
Operating air pressure range	40-150 PSI
Air consumption (@100 PSI & 8 GPM)	59 SCFM
Max fluid stall pressure @150 PSI air	.870 PSI
Air inlet	3/8" NPT(F)
Fluid inlet	1" NPT(F) 1-1/2" NPT(M)
Fluid outlet	3/4" NPT(F)
Cycles per gallon	.31
Wetted materials	Carbon Steel, Buna, SS, Nickel Plated Steel, Ultrathane Viton, Nylon
Service bulletin	SB1065

MODELS AVAILABLE

1130-019	Carbon Steel Stub
1130-025	Carbon Steel Stub, Flange Mount
1130-026	Carbon Steel Stub with Bung Adapter

LUBE CADDY

FEATURES:

- Completely portable, operates independent of air supply
- Tank holds up to 16 gallons of lubricant
- Fill cap and sight gauge
- 6' fluid hose
- Heavy duty wheels and caster
- Recommended option: air filter 3260-038 (use nipple 806826)
- Service bulletin SB1052

MODELS AVAILABLE

- 1200-001 With Analog Handle
- 1200-002 With Electronic Handle
- 1200-003 With Non-metered Handle

PISTON PUMPS | TANK PACKAGES

FEATURES

- UL 142 Tanks (Single and Double Wall)*
- Includes 50" x 1/2" Signature Series Hose Reel
- Includes Mechanical Meter with flex extension
- 3:1 Pump (Panther or Lynx)
- Fully assembled with everything you need for immediate use
- Filter Regulator
- 2" lockable Fill Cap and Gauge
- Tailgate delivery and advance notification available

* Check local codes for venting and installation requirements

Tank Package selection made easy

Step 1: Choose your tank style (Workbench, Vertical Obround or Horizontal Obround)

Step 2: Choose Single or Double wall construction

Step 3: Choose your pump: Heavy-duty Panther pump or the standard-duty Lynx pump for low volume installations

Step 4: Place your order using the model number listed next to your selection

Workbench Tank Packages	Size	Single/ Double wall	Pump	Tank Package Model Number
<p>Workbench style tanks are the best choice when work space is at a premium. The flat top and 30-33" height make workbench style tanks the perfect choice for crowded shops needing additional workspace</p> 	165 Gallon 33H x33Wx36L	Single Wall	Lynx 3:1	1134-003
			Panther 3:1	1134-001

	Panther 5:1	30' Hose Reel	1132-007
		50' Hose Reel	1132-010

* Purchase tank separately.

ACCESSORIES

FILTER, REGULATORS & LUBRICATOR

- 3260-039 Filter
- 3260-029 Regulator
- 3260-044 Lubricator
- 3260-034 Filter/regulator combination
- 3260-049 Filter/regulator & lubricator (2-pc combo)
- 3260-054 Filter, regulator & lubricator (3-pc combo)

AIR SUPPLY HOSE (2FT)

- 8144-002 1/2" x 2' w/ 1/2" x 3/8 NPT (M)

FLUID OUTLET HOSE (5FT)

- 8249-005 1/2" x 5' NPT (M) 5000 PSI

FLUID/PUMP CONTROL

- 3110-009 Pump Sentinel
- 3120-011 Air Solenoid Valve - 3/8" NPT(F)
- 3120-033 Air Solenoid Valve - 3/8" NPT(F)

TANK GUARDIAN / TANK LEVEL MONITOR

- 4520-010 Tank probe for monitoring fluid level
- 4520-011 Tank Guardian software for 4 Tanks
- 4520-012 Tank Guardian software for 8 Tanks
- 4520-013 Tank Guardian software for 12 Tanks
- Bung Adapters for Pride Series Pumps
- 4411-009 Panther/Tiger
- 4411-018 Double tap bushings (allows easy install and removal of pump)

MISC

- 832778 2" Vented fill cap
- 832706 4" Emergency Vent
- 4520-014 Black Knight Gauge (for tanks up to 90" tall)
- 4520-006 Tank Saddle (Converts standard fuel oil tank to accept a Balcrank hose reel.
- No welding required; it is securely fastened using vent tube and vent cap)
- 4520-007 Vent cap mounting kit (for attaching 4520-006 to vent outlet of obround tanks)

1150-012

MODELS AVAILABLE

- 1150-004 Bare Pump - 25-35 lb.
- 1150-012 Bare Pump - 120 lb.
- 1150-013 Bare Pump - 400 lb.

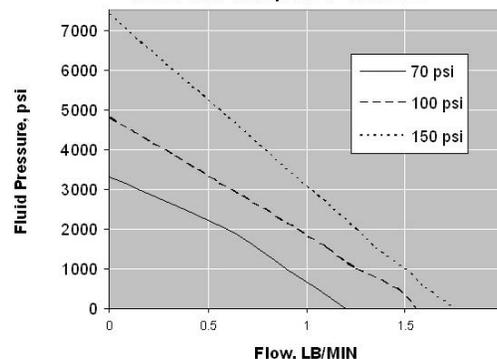

FEATURES:

- Simple design - Few moving parts, detachable external air valve
- Mechanical air valve - More reliable, no stalling and no icing
- Low air consumption - Less wear and tear on compressor
- Precise machined finishes and hardened lower piston assembly
- For reliable performance and long life
- Heavy duty pump lower - Produces 50:1 output pressure and accepts a 40-mesh inlet screen to remove foreign contaminants from entry system

SPECIFICATIONS

Pressure ratio	50:1
Eff. diameter	2.62"
Stroke	2.12"
Operating air pressure range	30-150 PSI
Air consumption (100 PSI air & 0.75 lb. /min.)	6.6 SCFM

ACCESSORIES

DOLLY BASES:

- 4310-001 120 lb.
- 4310-003 120 lb. wide track
- 4310-004 400 lb. heavy duty
- 4310-005 25-35 lb.

DRUM COVERS:

- 4420-002 120 lb.
- 4420-004 400 lb.
- 4420-006 25-35 lb.

DRUM CART:

- 4320-004 120 lb.
- 4320-008 120 - 400 lb.

PUMP OVER-RUN CONTROL:

- 3241-002 1/4" NPT(F)

FOLLOWER PLATES:*

- 4440-006 25-35 lb. tapered pail
- 4440-010 120 lb.
- 4440-011 400 lb.

***Balcrank uses weighted follower plates to eliminate air pockets in grease, and ensure proper function of pump.**

INLET SCREEN:*

- 4430-001

***A must when not using an air lift. Inlet Screen keeps dirt and debris from getting into system.**

AIR OPERATED PUMP LIFT

- 4450-001 Lift
- 4451-001 Valve

GREASE PUMPS | PANTHER HP® 50:1 PUMPS

FEATURES:

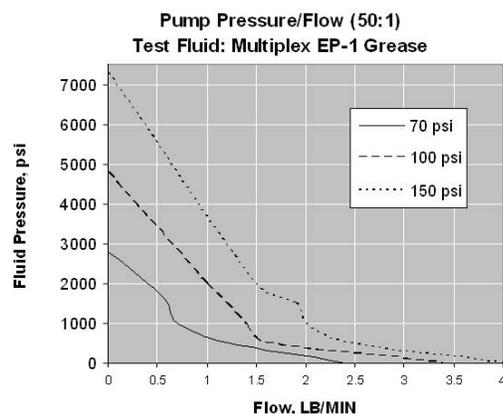

- Mechanical air valve - More reliable, no stalling, and no icing
- Designed for lower air consumption - Less wear and tear on the compressor
- Built in muffler - Promotes quiet operation, eliminates icing
- Precise machined finishes and hardened lower piston assembly - For reliable performance and long life
- Double acting pump lower - Produces 50:1 output pressure and accepts a 40-mesh inlet screen to remove foreign contaminants from entry system

SPECIFICATIONS

Pressure ratio50:1
Eff. diameter	2.44"
Stroke	3.25"
Operating air pressure range	40-150 PSI
Air consumption (@100 PSI & 1.5 lb./min.)	14.5 SCFM
Max delivery (free flow @ 100 PSI)	3.4 lb./min
Air inlet	1/4" NPT(F)
Fluid outlet	1/4" NPT(F)
Service bulletin	SB1063
Wetted materials	Stainless Steel, Carbon Steel, Brass, Aluminium, Delrin, Ultrathane, Buna-N

MODELS AVAILABLE

- 1150-009 Bare Pump - 25-35 lb.
- 1150-010 Bare Pump - 120 lb.
- 1150-011 Bare Pump - 400 lb.
- 1150-017 Bare Pump - Tote

***A must when not using an air lift.**
Inlet Screen keeps dirt and debris from getting into system.

AIR OPERATED PUMP LIFT:
4450-001 Lift
4451-001 Valve

FEATURES:

- Handles thicker #3 and #4 greases more easily than follower plate models
- Conical shaped inductor allows for better flow to pump inlet
- Inductor mounted pump applies weight to allow for better grease flow to pump inlet
- Eliminates contamination of pump and inductor plate when changing drum

TYPICAL 2-BAY QUICK LUBE LAYOUT

PIPING SPECIFICATIONS

Use these guidelines for selecting line sizes (recommended minimum diameters are given), tubing wall thickness and piping schedules for lubrication distribution systems. Air and water recommendations are for supply of air/water hose reels or for supply of air to pumps. Except as noted, maximum pressures shown represent the fluid pressure at the pump outlets when connected to their highest rated air supply pressure. Grease pump maximum pressures are reduced because they are pressure-limited by tubing strength and hose working pressure, as described in the footnotes.

Air & Water 0-200 ft.

Maximum Pressure	Tubing		Pipe	
	OD. ⁽³⁾	Wall ⁽²⁾	Size ⁽³⁾	Type

(1)....Line pressures for grease pumps are limited by the strength of steel tubing and grease hose working pressure ratings. Regulate air supply pressure for grease pumps to ("max pressure"/50) PSI to avoid line pressure limits.

(2)....Based on use of fully annealed steel tubing, 15,000 PSI yield strength.

(3)....Multiple air-operated pumps supplied by a common air line may require larger line sizes. Consult your Balcra distributor for efficient size recommendations.

(4)....Minimize the number of Elbows in grease line to reduce pressure drop. Use radius bends in preference to Elbows where installation permits.

(5)....When thermal expansion of oil may be present, use a pump pressure relief valve.

Balcrank

HOSE REELS

Fluid Dispensing Systems

HOSE REELS

HOSE REELS | SIGNATURE™ SERIES

HOSES REELS

FEATURES & BENEFITS

Eight position locking precision die cast latch mechanism, with secure easy-touch pull release

Machined thick wall hub parts for high strength and pressure capability

Heavy gauge stamped rims, outlet arm, and base.

Easy hose replacement due to single-arm outlet design

Five-position outlet arm for ceiling, wall, or tank-top hose reel mounting

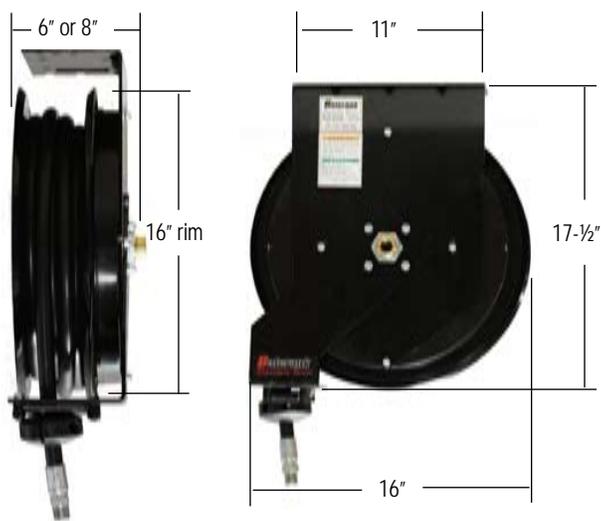

Tangential outlet position to reduce hose bending over outlet rollers

Wide six-roller outlet prevents hose pinch, reduces hose wear

Ball stops are included with hose

DIMENSIONS

Reference SB2002

BENEFITS

Easy To Install:

- Compact design to fit small spaces
- Ceiling, wall, tank mount, cabinet or mobile lube

Proven Design:

- Excess spring torque assures a reliable hose return
- Power Spring is designed for high reliability

Built to Last:

- Thick wall fluid swivel and hub
- Heavy gauge stamped rims, arms, and base
- Wide-Beam structural design for stiffness

Full Range of Model Choices:

- 30, 40, & 50 feet hose lengths available Styles for air, water, oil, and grease
- Custom powder coat paint colors available (Pg. 61)

HOSE REELS | PREMIUM™ SERIES

HOSES REELS

FEATURES & BENEFITS

16-position locking heavy duty cast latch mechanism with secure easy-touch pull release

Heavy gauge stamped rims and plate steel structural parts

Machined thick wall hub parts for strength and high pressure capability

Ready to install: a 2 ft. inlet hose is included with each complete reel

Dual outlet arm for strength and rigidity

Spool supported on both sides by a unitized heavy duty frame and long-life journal bearings.

Powder coated for corrosion resistance; custom colors available

Adjustable outlet arm for ceiling, wall, or tank-top reel mounting

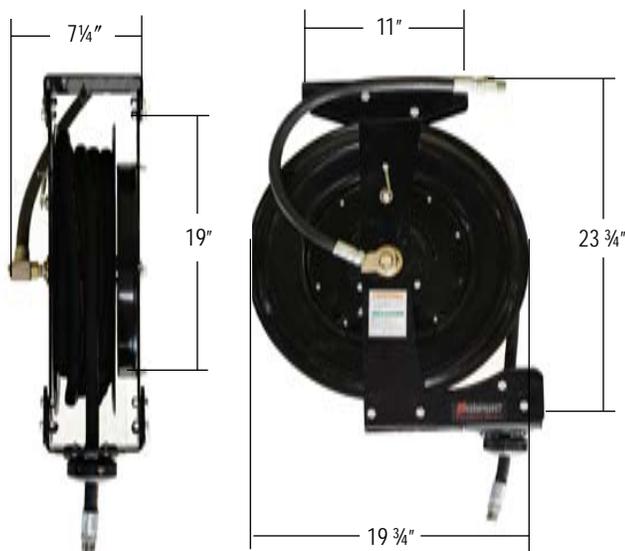

Sliding roller outlet prevents hose stack-up

Circular, six-roller outlet prevents hose pinch, reduces hose wear

Ball stops are included with hose

DIMENSIONS

Reference SB2015

BENEFITS

Dependable Performance:

- Excess spring torque assures a reliable hose return
- Power spring is designed for high reliability
- Full flow porting through the hub
- Durable, heavy duty latch mechanism
- Six-roller outlet protects against hose pinch

Heavy Duty Design:

- Thick wall swivel hub.
- Double journal bearings
- Heavy gauge stamped rims
- Structural plate steel frame
- Double side arm support
- High-strength roller outlet

Full Range of Model Choices:

- 40-, 50-, and 60- ft hose lengths available
- Styles for air, water, oil, and grease
- Custom powder coat paint colors available (Pg. 61)
- Ceiling, wall, tank mount, or mobile lube

Premium™ Series reels are sold in three configurations: ceiling mount, wall or side mount, and base mount. The following rules apply to make purchasing hose reels quick and simple:

- * When ordering ceiling mounted reels, use the current model number.
- When ordering wall or side mounted reels, use the current model number and add the suffix S.
- When ordering base mounted reels, use the current model number and add the suffix B.

(1)... Air/Water applications only.

HOSE REELS | PREMIUM™ EVX SERIES

HOSES REELS

FEATURES & BENEFITS

Large Hose capacity – handles a maximum of 100 ft. of hose, depending on fluid application and hose diameter.

Ball stops are included with hose

Rectangular Shaped roller outlet – prevents hose pinch and stacking.

Dual outlet arm – for rigidity and strength

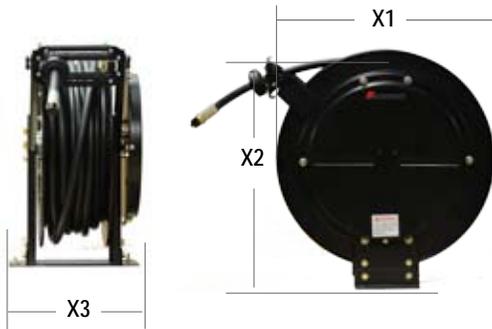

Powder coated – for a lifetime finish.

Spring canister – protects power spring from corrosion caused by the elements.

Heavy gauge steel base – ideal for mobile equipment application.

Dimensions

BENEFITS

- **Versatile installation:**
Tank or mobile lube mounting.
- **Improved steel construction; base, uprights, outlet arm:**
Provides substantial rigidity and strength
- **Double supported hose outlet arm:**
Provides extra support for larger hose diameters and mobile equipment applications
- **NEW, ball-bearing performance :**
Designed to reduce torque load of power spring and provides smooth hose retraction and long term reliability
- **High-volume design:**
Reduces fill rate time and improves overall efficiency.
- **Model choices:**
air/water, lube, grease and diesel.
- Models ordered with outlet hose include hose stop and 3' inlet hose.

HOSES REELS

FEATURES & BENEFITS

- 30' to 60' styles of Signature™ and Premium™ Series available
- All steel cabinet has high quality, powder coat finish prevents corrosion
- Custom paint colors available upon request to match lifts and work benches
- All-directional hose outlets prevent hose pinch
- Strong, rigid steel mounting structure
- Inlet hoses and ball stops are included for quick and easy installation

Side enclosure panels and reel inlet hoses are included with all Deluxe cabinet reels; model choices are listed in the table below. Refer to page 61-62 to select end panels and mounting accessories. Reference SB2009.

CUSTOM PAINT COLORS

CUSTOM and SPECIAL color painted reels can add style to an installation and set it apart from others!

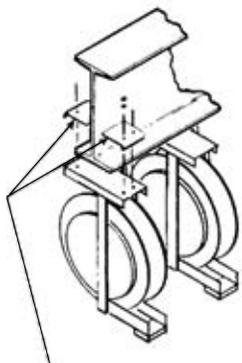

Custom colors are available on all open and enclosed reels. Balcrank's STANDARD paint colors for reels are gloss and textured black. A SPECIAL color is the customer's choice of the other colors in Balcrank's inventory. These paint colors are: yellow, white, blue, silver, red, and green. All SPECIAL color reel orders will require a minimum of 2 week lead time. CUSTOM colors are also available on open and enclosed reels. Balcrank will purchase these CUSTOM colors based on specifications supplied by the customer. All CUSTOM colors will require a minimum of 6 week lead time.

HOSE REELS | REEL ACCESSORIES

HOSES REELS

2230-013 - SIGNATURE™ / PREMIUM MOUNTING PLATE KIT

Attaches single Premium Series reels directly to structural beams with 4-1/2" to 6-1/2" flange widths. Model 2230-013 may be used to mount Premium Series reels to Balcrank hose reel mounting channels. (NOTE: Not to be used with Premium EVX Hose Reels)

2230-013 mounting bracket pair

2230-016 - SIGNATURE™ / PREMIUM MOUNTING ADAPTER PLATE KIT

The purpose of the kit is to facilitate the field installation of a Balcrank Signature™ Series Hose Reel onto a previously installed Graco mounting plate or Graco Series 250 and 350 hose reels. The mounting plate is designed to be used on Signature™ Series Hose Reels

TANK SADDLE

Use our exclusive saddle bracket, Model 4520-006 to quickly attach Balcrank hose reels to any 275 gallon oval or 550 gallon cylindrical tank. One step attachments, no welding or tank modifications required. Order separate vent kit, Model 4520-007, to attach to saddle to standard oval tanks at the vent cap location.
SB 4013

4520-007

2230-017 - SIGNATURE™ / PREMIUM MOUNTING PLATE KIT

This specially configured mounting plate kit was designed to facilitate simple, one person field installation of Signature™ Series Hose Reels to structural beams.

HOSE STOPS

Hose End Stops: Cushion hose return prevent excessive retraction.

MODEL	HOSE I.D.
2230-009	1/4"
2230-010	3/8", 1/2"
2230-011	3/4"
2230-012	1"

LUBE CONSOLE

The reliable alternative to hose reels. For quick lubes or other installations where a basement pit space is available. Reference SB2005.

- **Compact Design, Small Space Requirement**

Dimensions: 42" x 9" x 32"
Floor space - 2.6 sq. ft.
Reduced loss of work space

- **Premium Features & Finish Quality**

Heavy gauge welded steel cabinet
Durable powder coat finish
Premium hose outlets
Quality-styled to enhance a service area
Ships with 5 console stops and two hose stops
Includes lower hose guide assembly

- **Simple and Reliable Hose Management**

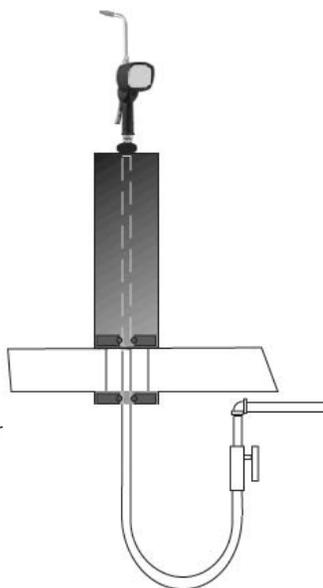

Low cost alternative to hose reels
Uses shorter hoses than overhead reels
Gravity hose tethering uses basement pit
Low maintenance, less downtime

- **Two-Bay Service Capability**

Install between bays for two-station service
Seven hose outlets
Use for any automotive service fluids
Higher equipment utilization

INSTALLATION

Select recommended 16-ft length hoses from the hose table on page 64. Be sure to add hand shutoff valves and hose tethering space as shown in the diagram. Follow architect's guidelines for floor opening. For more information, see SB2005.

Optional second lower hose guide assembly

2600-001 LUBE CONSOLE

2600-003 Lower Hose Guide Assembly (one included)

ACCESSORIES

- **2230-015 CONSOLE STOP**

Unique console stop is designed to attach around the hose of any control handle and fit snugly into the roller hose outlets of the Island Lube Console, Console Extension, and Floor Plate.

- **2600-006 FLOOR PLATE HOSE GUIDE**

Designed as a floor air station, this hose guide is made of 1/8" brushed aluminum and painted steel. Use with 2230-015 console stop.

- **2600-005 -LUBE CONSOLE EXTENSION**

Add-on unit with two hose outlets conveniently installs next to Balcrank's 2600-001 Island Lube Console for added capacity. Ships with 2 console stops. Reference SB2006.

- **2600-007 -CEILING PLATE**

Basement ceiling plate with two hose outlets.

HOSE REELS | REPLACEMENT HOSES

For complete hose model specification, combine "Model Prefix" in column 1 with a "Length Suffix" in the right-hand table.
 Example: Model 8134-030, 3/8" Air/Water Hose, 30 ft. length.

Balerank

Fluid Dispensing Systems

CONTROL HANDLES

CONTROL HANDLES

FEATURES

- One piece cast aluminum housing
- Shock resistant 5-digit resettable batch totalizer
- Non-resettable accumulative totalizer and a hidden resettable totalizer -used to track daily, weekly or monthly usage
- Sleep mode (2 minutes idle limit) to preserve battery life
- EEPROM retention allows all information to be retained if batteries are removed
- Oval gear mechanism for optimum accuracy
- Two outlet nozzle positions (in-line or pistol style), fits rigid, flex or flex 90 extension with automatic nozzle

SPECIFICATIONS

Units of Measure:

quart, gallon, pint or liter

Compatible Fluids:

engine oil, diesel oil, automatic transmission fluid and anti-freeze with a maximum viscosity of SAE 140

Wetted Components:

aluminum, acetal, steel, nitrile rubber

Accuracy:

+/- 0.5% of reading (lubricating oils)

Flow Range:

1-30 L/min (0.26-8 US gal/min)

Max pressure:

1000 PSI, 103.5 bar

Weight:

1.16kg, 2.55 lbs

Swivel inlet:

½" NPT

Operating temp:

32 °F (0° C) to 122 °F (50 °C)

Battery:

2 x 1.5 volt alkaline AA

3330-054

Reference SB3026

831992 - COLORED SHROUDS

Customize your fluids with colored shrouds. Shrouds also guard against shock damage of meter body and dial face. Standard colors are red, blue, green, and yellow.

FEATURES

- One piece cast aluminum housing
- Shock resistant 5-digit resettable batch totalizer
- Non-resettable accumulative totalizer and a hidden resettable totalizer -used to track daily, weekly or monthly usage
- 5 variable preset totals available and simple hand latch design
- Sleep mode (2 minutes idle limit) to preserve battery life
- EEPROM retention allows all information to be retained if batteries are removed
- Oval gear mechanism for optimum accuracy
- Two outlet nozzle positions (in-line or pistol style), fits rigid, or flex extension with semi-automatic nozzle

3332-005 - METER BODY SHROUD

Protective elastomer sleeve fits all Classic Pistol Grip Mechanical and Mechanical Preset Series metered control handles. Guards against shock damage of meter body and dial face.

FEATURES

- Robust grip with built in trigger guard
- Resettable batch display, resettable totalizer in gallon or liters and non resettable totalizer in gallons
- Meter can be field calibrated if needed
- Totalizer and calibration data retained when batteries are removed
- Color product identification caps included: red, green, blue and yellow.
- Oval gear mechanism for optimum accuracy
- Models available with rigid, flex, or flex 90 lance assemblies with automatic nozzle

SPECIFICATIONS

Units of Measure:

(Batch) quart, gallon, pint or liter (totalizer) gallon or liter

Compatible Fluids: Engine oil, diesel oil, and automatic transmission fluid with a maximum viscosity of SAE 140

Wetted Components:

aluminum, acetal, steel & Buna-N rubber

Measuring Accuracy: +/- .5% of reading (lubricating oils)

Flow Rates: .25-7 gal/min (1-25L/min)

Pressure: 1000 PSI (70 bar)

Weight: 1.55 lbs (0.70 kg)

Threads: ½ NPT compatible inlet and outlet threads

Operating temperature: 32 degrees to 140 degrees F (60 C)

Battery: 2 x 1.5 volt alkaline AAA

- 6,000 PSI working pressure

MODELS AVAILABLE

5310-018 - 1/4" NPT(F) x 1/4" NPT(M)

FLEXIBLE EXTENSION

8390-002 - 18" Flexible Extension

8390-003 - 36" Flexible Extension

Flexible whip hose extensions with crimped 1/8" NPT(M) fittings on each end. For grease applications up to 5,000 PSI. Includes adapter to attach to grease control handle.

5310-020 - GREASE COUPLER

Standard supergrip coupler. 10,000 PSI working pressure. 1/8-27 NPT threads.

OIL BARS

4200-014 OIL BAR

Features:

- Up to four dispense points,
- Heavy duty, Metal body
- Drain with steel screen and ½" NPT hose connection,

Dimensions:

13.25" deep x 28" wide x 35" high

Oil bar ships with one spigot. For two-, three-, and four-spigot oil bars, order additional 4200-012 spigots.

Service bulletin SB4038

DISPENSER SPIGOTS

Features:

- smooth trigger action,
- anti-splash flow diffuser
- shutoff valve.

Service bulletin SB4037.

MODELS AVAILABLE

- 4200-011 Spigot Only
- 4200-012 Straight Stem for Oil Bars ½" NPT (F)
- 4200-013 Gooseneck ¾" NPT(M)

4200-012

4200-013

Fluid Dispensing Systems

FLUID INVENTORY CONTROL

FLUID INVENTORY CONTROL

FLUID INVENTORY CONTROL | fusion (CCS)

FEATURES Central (CCS):

- Wirelessly control and manages up to 8 fluids and 48 handles
- Easy entry of authorized PIN codes and job information on the Central Dispense Keypad
- Fast completion of jobs
- Built-in ticket printer produces a detailed written record for each job
- Allows for future expansion of the system

fusion SYSTEM SPECIFICATIONS

fusion Central

Wireless Keypad	1
Wireless Metered Control Handles	1 – 48

FEATURES

- Capacity: Up to 16 fluids dispatched to a maximum 384 dispense points
- Electronic queuing of up to 900 dispenses from a PC
- User-friendly PC data interface with reporting and tank monitoring capabilities
- Job ticket printer, available with keypad, clearly reports all dispensing data
- PIN identification for up to 999 operators with separate management passwords
- Monitors and controls up to 16 tanks, 12 with sensor probes
- Dispenses in quarts, pints, liters, or gallons
- Totalizes tank levels in gallons or liters
- Simultaneous dispenses, one per zone or keypad
- Easy installation and flexible configuration for today's shop and for tomorrow's expansion
- Accurate dispense measurements
- 0.5 to 8.0 GPM - $\pm 5\%$
- Large LED display - better than ready lights
- Operated by low voltage dc power

3110-011

INSTALLATION CABLE

Three types of installation cable for Spectrum 1000 are available: Main Input/Output, Meter Valve, and Signal. Custom bundled wires reduce installation time. Factory cable required for warranty.

Prefix	50 ft..	100 ft.	150 ft.	250 ft.
3124	-050	-100	-150	-250
3126	-050	-100	-150	-250
3127	-050	-100	-150	-250

- 3124-XXX Main I/O Cable
- 3126-XXX Meter Valve Cable
- 3127-XXX Signal Cable*

* Signal Cable is also used for Tank Guardian p. 88

FLUID INVENTORY CONTROL | SYSTEM COMPONENTS

1 3110-011 Keypad Fluid control console for system zone. Pint, quart, liter, or gallon units of measure are program selectable. By means of a few simple inputs the operator can be recognized by the keypad, select the product to be dispensed, and preset the quantity to be dispensed. Optional ticket printer clearly reports all dispensing data. Keypad can control up to a maximum 12 dispense points per zone using two expansion power units.

2 Power Unit Included with Spectrum keypads, the Power Unit supplies low voltage electricity to all system components. All electrical connections of the system are located on the large and sturdy housing of the unit to simplify and speed up the installation procedure. The Power Unit can directly control up to 4 reels. Attaches to 110 VAC source power.

3 3120-046 Expansion Power Unit. An optional component, the Expansion Power Unit is connected to the main Power unit. It controls 4 additional reels by means of the same keypad. A maximum of two Expansion Power Units can be connected to the main PU increasing the maximum number of reels controlled by the same keypad to 12.

4 3120-044 LED Remote Display Clear and back-lighted 4" digits for high precision and convenient dispensing even away from the keypad. Blinking display alerts operator when fluid has been enabled for dispensing. On-going display of the batch total during dispense. Order one LED Remote Display per zone.

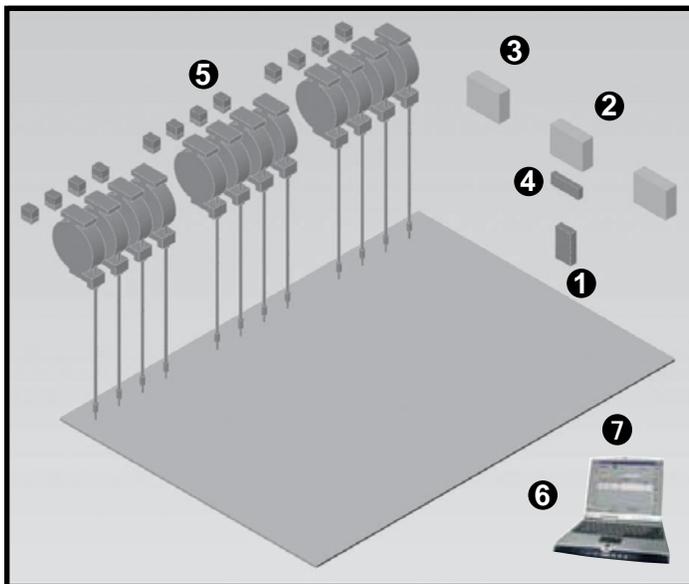

5 3120-045 Meter Valve Unit This unit takes the place of the impulse meter, fluid solenoid valve, and y-strainer. With this one unit, installation is simplified because system has fewer components. Install one Meter Valve Unit per reel. Order 3120-050 for WWF.

6 3120-047 PC Interface Software User-friendly and developed for the Windows XP environment. Software enables the activation of any dispenser from the PC; optimizes printing output; applies filters and/or orders the output of the operations performed; organizes and prints reports relevant to products, operators, or jobs. Performs tank level management; updates and displays levels of each tank; warns manager of low level conditions. Order one per system.

7 3120-049 Power Cord A cord to conduct power to the Spectrum 1000. 6 feet in length. 13 Amps at 125V. 1625 Watts

DISPENSE ZONE WITH MAXIMUM EQUIPMENT

TANK GUARDIAN

The Tank Guardian is used for real time tank monitoring on the Spectrum 1000 FIC system. Information can be found on page 86

FLUID INVENTORY CONTROL | SPECTRUM 100™

FEATURES

- Spectrum 100™ Capacity: up to 4 fluids to 16 stations, 2 fluids to 32 stations, or 1 fluid to 64 stations
- Electronic queuing of up to five dispenses per fluid
- Automated priority assignment of dispense in the queue
- Optional job ticket printer capable of printing a record of each transaction, as well as daily and monthly historic dispense-log reports
- Self-test diagnostic procedure at each power-up of the system
- PIN identification of up to 32 operators with separate protected ID for up to 5 program management functions
- Tank level management including current tank level, tank capacity, and tank low-level alert
- Small console footprint: 7" L x 5" W x 1-3/8" H
- Input power 110 volt AC supplies 24 volt DC output to power system components
- Fluid measurement: pints, quarts, gallons, or liters
- Service fluids: motor oils, synthetics, ATF, gear oil, anti-freeze
- Pre programmed and tested before leaving the factory

MODEL AVAILABLE

3110-006P Pre programmed Spectrum 100™ Queuing Console

832057 WIRE PREP KIT

Wire Prep Kit: Assists installers in providing premium quality wiring hook-ups for Spectrum 100. Kit includes cable jacket remover, wire stripper, and pin crimper. Ferrules for use on Spectrum cable are also included.

INSTALLATION CABLE FOR SPECTRUM 100

Three types of installation cable are available: Communication/Power, Solenoid Valve, and Impulse Meter. Custom bundled wires reduce installation time.

3121-XXX Communication Power Cable
3122-XXX Impulse Meter Cable
3123-XXX Solenoid Valve Cable

Prefix	50 ft.	100 ft.	150 ft.	200 ft.	250 ft.	500 ft.	1000 ft.

3123	-050	-100	-150	-200	-250	-500	-000

Service bulletin SB3039

3120-030 - Smart Controller

Input/output communication module required to provide distributed control and communication to up to four air or fluid solenoids using the Spectrum™ Queuing Consoles. Wall or ceiling mounted near pumps and hose reels.

3120-035 - Ticket Printer

Small desktop ticket printer uses standard 2.2" paper tape. Locate adjacent to the console to print data reports directly from the queuing console. Includes signal cable, power adapter, and cord for 110 VAC outlet. For use with Spectrum™ 100.

3120-039 - Printer Extension Cord

250 Ft. length cable connects communications port from Model 3120-035 Ticket Printer to Model 3110-006 Queuing Console, allowing remote viewing of printer reports. Up to two extensions may be used in series to provide printer operating distance up to 500 feet.

3120-034 - Spectrum Impulse Meter

In-line meter measures dispensed fluid and generates a digital pulse signal used by the console to determine pumped fluid quantities. Wiring connects directly to the console. 1,000 PSI pressure rating, 1/2" NPT ports, measuring accuracy +/- 0.5%. Enhanced accuracy available by custom calibration during installation. Specify one per pump.

3120-032 - Fluid Solenoid

Stops the flow of fluids instantly at the preset quantity. Pressure rating 1500 PSI; port thread size 1/2" NPT(F); 24 Volt DC power. Order one per dispensing reel/handle.

3120-033 - Air Solenoid

Provides for the remote shutdown of dispensing pumps from the fluid control console. Pressure rating 200 PSI; port thread size 3/8" NPT(F); 24 Volt DC power. Order one per controlled pump.

3120-031 - Ready Light

Alerts the bay technician when fluid batch is available for dispensing. Bright green light is powered and operated through the Smart Controller. Ready light can be installed in 1/2" hole in arm of both Signature and Premium Series hose reels. For use with Spectrum™ 100 system. (24 VDC)

3120-051 - Y-Strainer - 1/2"

3120-010 - Y-Strainer - 3/4"

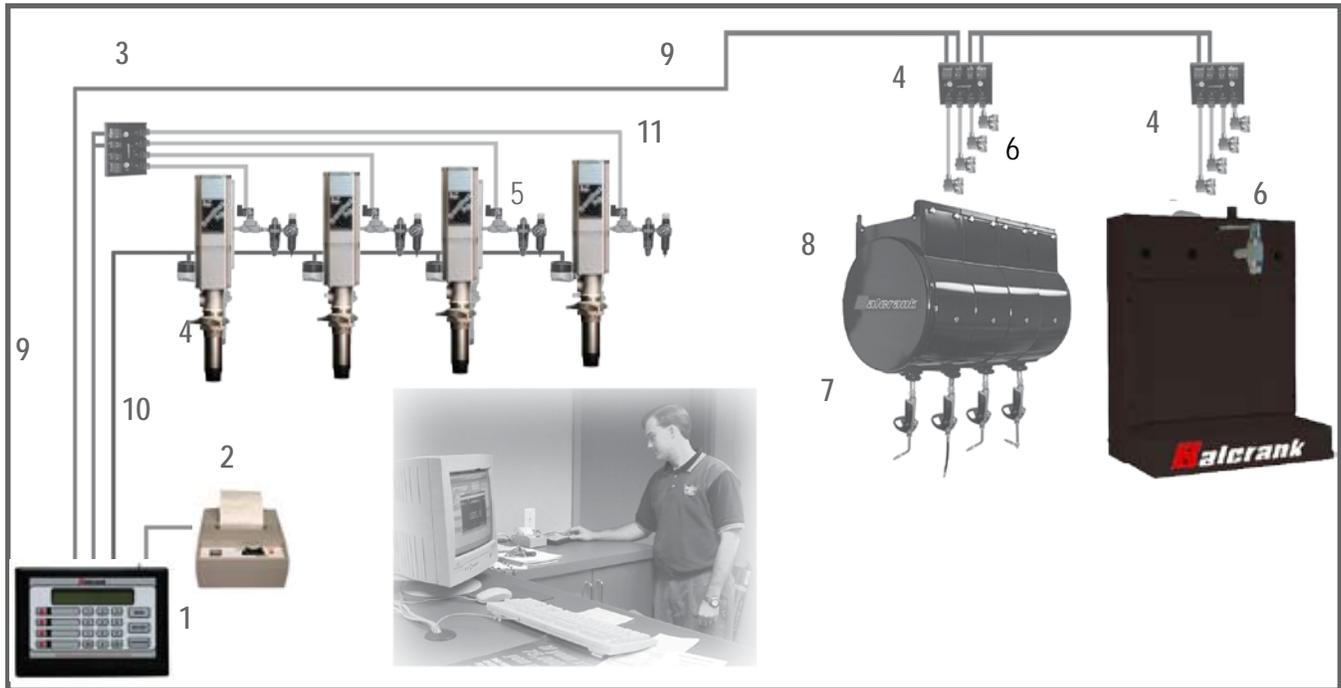

3120-040 - Y-Strainer - 1"

For use in the fluid line prior to fluid solenoids to assure reliable solenoid valve operation. Filter element is easily cleaned. Order one per dispensing station. 1000 PSI Water Pressure @ 100 °F

TANK LEVEL MONITORING

4520-010 Tank Guardian Monitors the fluid level of tanks by detecting the static pressure generated by the fluid height. A tube is inserted in the tank and the fluid level or volume is displayed on the Tank Guardian screen. Displays in gallons or liters. Tank Guardian can be used as a stand alone monitoring system or with any of Balcrank's FIC systems.

Tank Guardian Software Multi Tank -4, -8, and -12. This software interface enables the user to connect up to 12 Tank Guardian level gauges. It saves historical tank level records according to time interval, level change, and volume change. With the recorded data, a diagram can be displayed showing the historical tank level records. High and low level prompts are included in the display.

- 3120-006** - Pints
- 3120-007** - Quarts
- 3120-008** - Gallons
- 3120-016** - Quarts, Coolant*

Service bulletin SB3003.

Impulse meters convert fluid movement into a pulse count signal. Order one per pump. Select meters to match the unit of measure desired for the installed system. For use in 12V, 24V, and 120V systems.

*This is the only model available for coolant.

Y STRAINER

- 3120-051** - Y-Strainer - 1/2"
- 3120-010** - Y-Strainer - 3/4"
- 3120-040** - Y-Strainer - 1"

For use in the fluid line prior to fluid solenoids to assure reliable solenoid valve operation. 1000 PSI water pressure @ 100 °F Filter element is easily cleaned. Order one per dispensing station.

3120-011 Air Solenoid Valve

Provides for the remote shutdown of dispensing pumps from the fluid control console. Pressure rating 200 PSI; port thread size 3/8" NPT(F); 24 Volt AC power. Order one per controlled pump.

3120-012 Fluid Solenoid Valve

Stops the flow of fluids instantly at the preset quantity. Pressure rating 1500 PSI; port thread size 1/2" NPT(F); 24 Volt AC power. Order one per dispensing reel/handle.

3120-031 Ready Light

Alerts the bay technician when fluid batch is available for dispensing. Bright green light is powered and operated through the Smart Controller. Ready light can be installed in 1/2" hole in arm of both Signature and Premium Series hose reels. For use with Spectrum™ 100 system. (24 VDC)

FLUID INVENTORY CONTROL | PUMP SENTINEL

FEATURES

- Prevents fluid spills during non-working hours by using a built in timer to turn off air supply to all pumps at a predetermined time each day
- Allows for controlled dispensing of fluids
- Capable of preventing fluid theft by using switches to enable or disable up to six pumps
- Master key needed to turn system on
- Ideally suited to improve existing FIC systems that have been installed without the protection of air solenoids
- 6' cable to run to junction box
- Small Console footprint: 6.5" L x 5" W x 3" H
- Patent applied for

MODEL AVAILABLE

3110-009 Pump Sentinel Console

SYSTEM SPECIFICATIONS

Power Required 120 VAC, 60/50 Hz, 50 Watts
Control Capacity 6 Products
Operating Temperature 0 °F -140 °F (-17 °C - 60 °C)
Solenoid Rating 24 VDC, 5 Watts Max.
Dimensions 3" H x 6.5" W x 5" D
Cable Length 6 feet

Air Solenoid 3120-033 (sold separately) Provides for the remote shutdown of dispensing pumps from the pump sentinel. Pressure rating 200 PSI; port thread size 3/8" NPT(F); 24 Volt DC power. Order one per controlled pump.

No. 18 AWG wire is recommended for all runs less than 400 feet. For runs from 400 to 625 feet, use wire no. 16 AWG or larger. Normally the 24 VAC wiring can be run around the overhead structure of the building without using conduit.

Fluid Dispensing Systems

DRAINS

USED OIL
EQUIPMENT

USED FLUID EQUIPMENT | ROUGHNECK II™ SERIES

The Roughneck II™ Series drain is the fast, affordable way to capture used oil and transfer it into any bulk storage tank or drum using regular shop air. The Roughneck II™ has a patented automatic fluid evacuation valve (US Patent 5,921,262) which eliminates gravity draining, pouring, or the need for an evacuation pump. A seven-foot, quick-disconnect hose remains with the 23 gallon storage tank, keeping it out of the way until it is ready to be used again. A low pressure safety valve prevents over-pressurization, s-hooks provided allow for hanging tool from bowl for quick retrieval and the clear evacuation-hose doubles as a sight level tube showing the fluid level in the steel tank. The Roughneck II™ features non-marking large 10-inch rubber wheels and extra-wide rubber 4-inch front casters to maneuver over the toughest shop floors. The Roughneck II™ is a NFPA approved design. It is delivered in Black for used oils and Green for used antifreeze unless otherwise requested. Other colors available are blue, yellow, white and red, (two-week lead time requested on special color requests). Reference SB4027.

MODELS AVAILABLE

- 4110-022 Used Oil Drain
- 4110-023 Used Antifreeze Drain

FEATURES

- Capacity: 23 gallons
- 47" to 74" telescoping bowl height
- 19.25" bowl with screen
- Large diameter rubber wheels and wide casters
- Heavy gauge, all steel construction
- Tip resistant balanced design
- Level gauge
- Antifreeze drains painted with green powder coat

Service bulletin SB4022

MODELS AVAILABLE

- 4110-012 Used Oil Drain
- 4110-017 Used Antifreeze Drain

FEATURES

- Capacity: 16 gallons
- 41" to 65" telescoping bowl height
- 19.25" bowl with screen
- Male drybreak coupler included for top port evacuation
- Drum dolly included
- Level gauge
- Antifreeze drains painted with green powder coat

MODELS AVAILABLE

- 4110-010 Used Oil Drain
- 4110-018 Used Antifreeze Drain
- 4110-011 Drumless Used Oil Drain
- 4110-019 Drumless Used Antifreeze Drain

PREMIUM DUTY SERIES

Note: Same Features as the Roughneck series on previous page with no pressurized fluid evacuation

4110-012

4110-017

SPILLGUARD SERIES

4110-010

4110-018

FEATURES

- Capacity: 17 gallons
- Extract used oil and other fluids from any vehicle - safer, cleaner
- No more stripped drain plugs
- Great for cars, boats, motorcycles, and small engines
- Easily remove overfills
- Vacuum-charged unit is completely portable and easy to use
- Includes six suction probes (metal and flexible)
- Suction probes equipped with quick-disconnect couplers
- Adapters for BMW and Volkswagen included
- Self-evacuating feature makes emptying clean and easy
- Clear bowl capacity: 2 gallons
- Service bulletin SB4045

MODELS AVAILABLE

- 4140-024** Oil Evacuator
- 4140-025** Oil Evacuator with Clear Dome and Mercedes Adapter

Specifications

Tank capacity	17 gallons
Max. draining capacity	12 gallons
Air pressure for vacuum	100 PSI
Depressurization time	2-2.5 minutes
Noise level	75 DBA
Suction rate	.04-0.5 GPM
Suction hose	6.5 ft.
Draining hose	6.5 ft.
Dimensions	23" x 15" x 34"

FEATURES:

- 5 gallon capacity
- Set screw to hold adjustable funnel in place up to 64" height

MODELS AVAILABLE

- 4110-006 - Five Gallon Lift Oil Drain
- 4111-001 - Replacement funnel and tube assembly for 4110-006
- 4111-002 - Drain Adapter

- 4310-006 - Dolly for 4110-006 Drain

*Dolly sold separately

USED OIL DRAINS & ACCESSORIES

4140-006 - Transmission Drain Pan.

Features:

- 23.5" x 21.5" x 5"
- Durable impact and heat resistant plastic
- Used with any lift drain having 7" or larger funnel

831886 - Replacement Drain Bowl

Features:

- Strainer included
- Splashguard design
- 19 1/4" diameter
- Black high density polyethylene construction

4140-023

4140-016 - Coupler
4140-023 - Nipple

Quick disconnect coupling rated for vacuum or up to 3,000 PSI fluid pressure, with liquid-tight sealing of both halves when disconnected. 3/4" NPT line size.

USED FLUID EQUIPMENT | TRUCK DRAINS

FEATURES:

- Capacity: 26 gallons, measurements 9"H x 24"W x 36"L
- 1" NPT drain port with plug
- Large 8" diameter wheels for easy rolling
- Large front caster with tubular U-handle for excellent maneuvering
- Internal baffles with upper screen to stabilize fluid during movement.
- Powder coat finish for excellent corrosion resistance (safety yellow)

Service bulletin SB4051

4120-002

MODELS AVAILABLE

4120-006 Truck Drain

4120-002 Evacuation kit with nipple and male dry break coupler available

ROLLING PIT DRAIN

FEATURES:

- Capacity 34 Gallons - Fewer evacuations required
- Metal baffles with anti-splash screens, and side splash guards - Reduces messy clean ups
- Ball drain valve and cam-lock coupler included - Provides cleaner and faster evacuations.
- Handy tool shelf built into unit - For easy tool storage and retrieval
- 3" diameter rollers - Can be adjusted to accommodate a pit width of 34" to 53"
- Roller height can be adjusted up or down 2"
- Service bulletin SB4018

4140-012 Tandem Pit Drain Connector 2' x 1"
connector hose with female cam lock connectors on both ends. Used to connect two rolling pit drains for evacuation from one side.

4140-013 Evacuation Hose 2' x 1"
evacuation hose with female cam lock connectors to attach to rolling pit drain and 1" NPT(M) to attach to the used oil evacuation manifold or used oil pump.

4140-014 Tandem Pit Drain Kit
Connects two tandem Pit Bosses in a common pit for flow-through evacuation. Consists of connector hose, shutoff valve, pipe nipple, bushing, cam lock nipple, and cam lock cover.

4140-021 Outfit Kit
Includes ball valve with nipple, quick couplers, and a dust cap.

TANK LEVEL GAUGES

Mount on tank bung fitting. Display dial shows the remaining fluid depth in inches as the attached float level changes. For stationary tanks only. Not recommended for mobile lubers.

4520-014 0"-99"

FEATURES

- Uses less than 1/5 the energy of air operated devices
- Includes four evacuation wands (metal and flexible), wall mounting kit, 20' suction hose
- Evacuation wands equipped with quick-disconnect couplers
- Service bulletin SB4050

The Balcrank evac is an environmentally friendly product, designed for high volume shops. The evac removes petroleum based products through any fill plug or dipstick. Top of the engine evacuation offers a speedy alternative to removing skid plates, splash guards, differential covers as well as eliminating potential problems that stripped drain plugs with aluminum engine pans may cause. The technician simply replaces the vehicle's dipstick or fill cap with the evacuation wand that best fits the opening. He then presses the start button and moves on to his next task; the evac system automatically removes the fluid, shuts itself off and sounds an end of cycle tone. The used oil is pumped directly to a bulk storage tank and is never handled by the technician or exposed to the atmosphere. The oil change can be completed while the one technician is completing the other automobile maintenance services, all without a pit or a lift. evac will reduce your overhead, is a green product and will pay for itself typically within 3 to 6 months.

SPECIFICATIONS

Electric motor	110 VAC/60Hz
Max. draining capacity	1.6 qts per minute
Horizontal suction	.33'
Vertical suction	.5'
Horizontal delivery	1.60'
Vertical delivery	.10'
Noise level	Less than 70 DbA
Fluid inlet	3/4"
Fluid outlet	3/4"
Dimensions	13.7" x 11.6" x 13.3"
Suitable fluids	Motor Oil, ATF

BALCRANK ACCESSORIES

Pressur-Matic
Model 47054 Pressur-Matic can be permanently installed handle for properly servicing pumps requiring as low as 100 psi (range pressure to approximately 8000 psi air pressure). (Does not include volume on either high or low pressure tank for high pressure). Packed in crates with 1/2" M.P.T. inlet - 1/2" P.P.T. outlet.

Visible Air Line Oiler
Model 358 Balcrank Visible Oiler automatically 1 inch in. Translucent sight tube 1/2" diameter when in SE. For all equipment on all "Jet Power" Pumps. Oiler only.

Air Filters
Model 32531 Air Filter for individual units or 1/2" or 3/4" or 1" or 1 1/2" or 2" ports equipment. 1/2" M.P.T. on Model 32739 Air Filter for installation in all 1/2" pipe other equipment from air protecting equipment. Filter mounted. 1/2" P.P.T. inlet and outlet.
Model 32740 Custom Filter Cartridge for Model 32739.

Blow Gun
Model 41649 Air Blow Gun for heavy duty use.

Air Pressure
Model 32741

ACCESSORIES | FILTER REGULATOR LUBRICATOR

FEATURES & BENEFITS

Compressed Air Preparation Means Better System Performance

- Use filters to clean air and remove moisture.
- Lubricators inject oil mist into compressed air to improve performance and life of air-operated pumps.
- Use pressure regulators to control fluid flow rates and to set correct system operating pressures.

Mini Series for Low Volume Air Applications

- Small, compact size.
- In-line mounting using standard piping and nipples.
- Effective filtration with automatic drain.
- Accurate pressure regulation. Precise lubrication.
- Ideal for control of pumps for oil bars, spigot dispensers and reduced flow transfer pumps.
- For pressures up to 150 PSI and flows of 15 SCFM.

Standard Series for Heavy Duty Lube Systems

- Heavy duty metal body and bowls.
- Sight glasses standard on metal bowls for visible liquid levels.
- Rated for air system pressures up to 250 PSI.
- Optional automatic drains available for Filters.
- Available as individual units or assembled.
- In line mounting using standard piping and nipples.

SPECIFICATIONS

STANDARD SERIES

Filters:

- Excellent water removal with 40 micron filter large filter element surface
- Heavy duty zinc die cast body Metal bowl with sight glass Max. primary pressure 250 PSI Optional automatic filter drain

Regulators:

- Heavy duty zinc die cast body Max. primary pressure 250 PSI 2-125 PSI adjustment range Pressure gauge standard Two high flow 1/4" gauge ports

Lubricators:

- Heavy duty zinc die cast body Max. primary pressure 250 PSI Metal bowl with sight glass Proportional oil delivery Precision needle valve Bowl can be filled while air line is under pressure Transparent sight dome for 360° visibility

1-Piece Combo Units:

- Excellent water removal efficiency 40 micron depth style filter. Large filter element surface
- Heavy duty zinc die cast body Metal bowl with sight glass Max primary pressure 250 PSI 2-125 PSI adjustment range Pressure gauge standard
- Two high flow 1/4" gauge ports

SPECIFICATIONS

MINI SERIES

Filters:

- Excellent water removal with 5 micron filter element
- Heavy duty zinc die cast body 0-250 PSI pressure rating - Zinc die cast bowl
- 0-150 PSI pressure rating - Poly bowl Auto drain included

Regulators:

- Heavy duty zinc die cast body Max. primary pressure 250 PSI 2-125 PSI regulation range Pressure gauge standard Full flow gauge ports -1/4"

Lubricators:

- Heavy duty zinc die cast body 0-150 PSI pressure rating Proportional oil delivery Precision needle valve
- Transparent sight dome for 360° visibility High strength polycarbonate bowl

ACCESSORIES | FILTER REGULATOR LUBRICATOR

1 PIECE FILTER/REGULATORS

Best choice for pump air control. Filter prolongs wear life of pump, automatic drain removes moisture, regulator adjusts pump air supply pressure for best performance.

Model	Line Size
3260-033	1/4" NPT(F) mini, zinc bowl
3260-034	1/4" NPT(F)
3260-035	3/8" NPT(F)
3260-036	1/2" NPT(F)
3260-037	3/4" NPT(F)
3260-060	1/4" NPT(F) mini, poly bowl

AIR LINE FILTERS

Use air filters to remove moisture and particulate solids from air supply lines. Manual drain. (Automatic on mini).

Model	Line Size
3260-038	1/4" NPT(F) mini
3260-039	1/4" NPT(F)
3260-040	3/8" NPT(F)
3260-041	1/2" NPT(F)
3260-042	3/4" NPT(F)

2-PIECE PIGGYBACK F-R-L UNITS

See complete specification on opposite page. Features automatic drain all sizes.

Model	Line Size
3260-048	1/4" NPT(F) mini, zinc bowl
3260-049	1/4" NPT(F)
3260-050	3/8" NPT(F)
3260-051	1/2" NPT(F)
3260-052	3/4" NPT(F)
3260-059	1/4" NPT(F) mini, poly bowl

AIR REGULATORS

Use air regulators to individually adjust supply pressure to air-operated pumps. Includes gauge.

Model	Line Size
3260-028	1/4" NPT(F) mini
3260-029	1/4" NPT(F)
3260-030	3/8" NPT(F)
3260-031	1/2" NPT(F)
3260-032	3/4" NPT(F)

3-PIECE COMBO F-R-L UNITS

Full air line control and conditioning for pump operation. Select from 1/4" through 3/4" and miniature sizes. Manual drain. (Automatic on mini).

Model	Line Size
3260-053	1/4" NPT(F) mini
3260-054	1/4" NPT(F)
3260-055	3/8" NPT(F)
3260-056	1/2" NPT(F)
3260-057	3/4" NPT(F)

AIR LUBRICATORS

Use air lubricators to maintain airborne oil mist for pumps to prolong operating life and reduce wear.

Model	Line Size
3260-043	1/4" NPT(F) mini, poly bowl
3260-044	1/4" NPT(F)

Fluid Dispensing Systems

BROOKINS

BROOKINS

BROOKINS | HAND PUMPS

1300-001 - Economy Barrel Pump

Features:

- 16 strokes per gal
- Suction Tube
- Bung Adapter
- For noncorrosive lubricants, solvents, agricultural and industrial chemicals
- Steel and brass

1300-019 - Piston Hand Pump

Features:

- 12 strokes per gal
- Suction Tube
- Bung Adapter
- For diesel, engine oils, hydraulic oils, gear oils, antifreeze, degreasers, w/ washer fluid
- Polypropylene, stainless steel, buna

1300-021 - Hand Operated Pump

Features:

- 4' fluid hose
- Suction Tube
- 5 gal drum size
- For machine oils, gear oils, anti-freeze

1300-022 - High Flow Rotary Pump

Features:

- 1 gal. of fluid per 9 revolutions
- Suction Tube
- Bung Adapter
- Cast iron, steel, buna

1300-026 - Suction Gun

Features:

- Heavy duty construction
- Needs no priming
- 11" flexible hose included
- Used for all purpose draining or filling

FEATURES

- All steel construction – excellent rigidity and strength when side loads are applied
- Includes 2' x ½" inlet hose - provide fast easy connection to piping
- Powder coated finish – provides durability and corrosion resistance
- Steel latch mechanism – easy to hear and latch hose into desired position for use

MODELS AVAILABLE

2130-002 Air Reel

ELECTRIC CORD REELS

2510-010 - Light Cord Reel.

Features:

- 50' cord length, 18 gauge
- Powder coated steel housing
- Protected on/off switch

2510-011 - Electric Cord Reel.

Features:

- 30' cord length, 16 gauge
- Powder coated steel housing
- Adjustable spring steel hook
- Adjustable cord stop
- Reset-able circuit breaker
- 110-125V
- Max amp rating -10 amps
- 3 Conductor outlets

BROOKINS | GREASE GUNS

5200-006 - Lever Style Grease Gun

Features:

- 14 oz capacity
- Filling options: cartridge or bulk grease
- 10,000 max working pressure

5200-007 - Pistol Style Grease Gun

Features:

- 14 oz capacity
- Filling options: cartridge or bulk grease
- 5,000 max working pressure

5200-010 - Air Operated Continuous Feed Grease Gun

Features:

- Patented 360° rotating cartridge
- Heavy duty professional grade construction
- Three way filling
- Includes air vent and filler plug
- 2,400-6,000 PSI max working pressure

5200-011 - Battery Operated Grease Gun

Features:

- 2 Powerful 18 volt batteries (#832352)
- 1-hour Quick Charger (#832351)
- Three way filling
- 42" Whip hose with coupler
- Bend restrictors on hose
- Shoulder strap included
- Carrying case
- 9,500 PSI max working pressure

5200-012 - Professional Series Grease Gun

Features:

- Short stroke grip action for easy use
- Heavy duty professional grade construction
- Three way filling
- Includes air vent and filler plug
- Whip hose and metal spout standard

5200-013 - Mini Grease Gun

Features:

- Short stroke grip action for easy use
- Heavy duty professional grade construction
- Three way filling
- Includes air vent and filler plug
- Whip hose, straight spout and metal hose extension standard

8390-004-42" Hose Whip for 5200-011

GREASE GUNS ACCESSORIES

5400-003- Bearing Packer

Features:

- Easy to use with hand or air operated grease guns
- Bearing capacity: minimum 25/64" ID; maximum 5-5/16" OD

8390-002 - 18" Flexible Extension

Flexible whip hose extensions with crimped 1/8" NPT(M) fittings on each end. For grease applications up to 5,000 PSI. Includes adapter to attach to grease control handle.

5310-022- REPLACEMENT GREASE COUPLER

FILLERS

USED OIL DRAINS

6110-017 - Battery Filler

Features:

- 2 1/4 qt capacity
- Bronze plastic finish

6111-002 Replacement Spout for Battery Filler

Features:

- Black plastic

6110-010 - Radiator Filler

Features:

- 12 qt capacity
- Black plastic

6330-005 - Drain

Features:

- 3 1/4 gal capacity
- 16" x 4"
- Galvanized metal

BOTTLES

6420-006 Plastic Bottle

Features:

- 1 qt capacity

6420-007 - Spout and Dust Cap

Features:

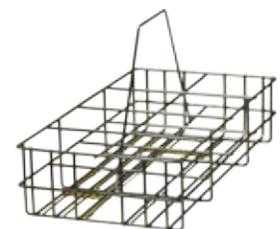

- 8 spouts and dust caps for 1 qt bottles

6420-008 - Oil Bottle Kit

Features:

- 1 qt capacity per bottle
- 8 bottles with spouts and dust caps
- Metal basket

6420-009 Metal Basket

Features:

- Holds Eight 1qt bottles

Customer Support

800-747-5300 or 828-645-4261 (M-F, 8 am - 5 pm EST)

- Order entry
- Product availability
- Pricing
- Basic product information
- Shipping dates and delivery information
- Product return authorization

Order By Fax

800-763-0840 or 828-658-0840

- Fax orders day or night
- Free-up phone lines
- Order confirmed next business day by fax or email
-

Technical Support

800-747-5300 or 828-645-4261 (M-F, 8 am - 5 pm EST)

- Repair advice
- Product application recommendations
- Warranty claims and returns
- Service bulletins
-

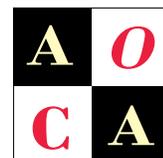

Email Ordering & Online Support

- www.balcrank.com - web site
- info@balcrank.com - email
- orders@balcrank.com - email ordering
